12. Dermatology) |
| * 25. Industrial Medicine | * 50. Veterinary Medicine |

THE ARMY MEDICAL LIBRARY

Washington, D. C.

THE ARMY MEDICAL LIBRARY

PHOTODUPLICATION SERVICE

The purpose of photoduplication is to extend the services of the Library to those at a distance who cannot come in person to consult its collections. In the case of the Army Medical Library it provides an economical and efficient means of contributing more largely to the advancement of medicine and the public welfare.

In order that photoduplication may render the greatest possible aid to those engaged in medical research, the following policies in regard to its conduct will be observed:

1. The Library will lend without charge single microfilm copies of original articles published in medical periodicals not available locally. Such loan requests should be routed through libraries, governmental agencies, or research institutions. The microfilm, being a part of the duplicate collection of the Library may be used for ninety days and will be returned to the Library at the end of the loan period.
2. Requests for microfilms and photoprints for official business in the Department of Defense will be filled free of charge.
3. Microfilms will also be sold to those desiring to retain them, at a rate of 50 cents for each 50 pages or fraction thereof from a single article.
4. For the benefit of those not having the facilities to read microfilms, photoprint copies of separate articles from periodicals will be supplied at a charge of 50 cents for each 10 consecutive pages or fraction thereof from a single article.
5. Except when the order is accompanied by the written permission of the copyright owner, The Army Medical Library will not reproduce books protected by copyright, or entire periodical issues.

INSTRUCTIONS

All requests, including those for free loans, must be submitted on Army Medical Library official order blanks (AML Form 48). A supply will be furnished on request.

All purchase orders must be accompanied by payment in cash or by check or money order made payable to the treasurer of the United States, or by Army Medical Library Coupons, which may be ordered in any quantity from the Library at 50 cents each.

Federal agencies will be billed periodically by Standard Form 1080 (Voucher).

Refunds for material the Library is unable to supply will be made by coupons unless cash refund is specifically requested.

The CURRENT LIST OF MEDICAL LITERATURE is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: \$3.00 per year (\$3.75 foreign); 10 cents per single copy. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

Published weekly by the ARMY MEDICAL LIBRARY, 7th Street & Independence Ave., S. W., Washington 25, D. C., as an intraservice publication of the Department of the Army. Lists all articles of medical interest contained in current journals received. Subject index provided monthly. Exchange invited.

CURRENT LIST OF MEDICAL LITERATURE
Vol. 15, No. 12 October 8, 1948

I. Allergy

Acta allerg., Kbh., 1948, 1: No. 1

- HALPERN, B. N. Etat actuel de la question des antihistaminiques de synthèse. 3-39.
BONNEVIE, P. Fishermen's Dogger Bank itch, an allergic contact-eczema due to the coralline *Alcyonidium hirsutum*, the sea-chervil. 40-6.
SALEN, E. B., & ARNER, B. Some views on the aspirin-hypersensitive allergy group. 47-84.
VALLERY-RADOT, P., HALPERN, B. N., & MAURIC, G. Considérations sur le mécanisme de l'hypotension artérielle au cours du choc anaphylactique et histaminique chez le lapin. 85-97.
HALPERN, B. N., HAMBURGER, J., & CRUCHAUD, S. Action préventive d'un antihistaminique dérivé de la thiodi-phénylamine sur l'œdème aigu du poulmon expérimental. 97-103.
FLENSBORG, E. W., & SAMSGØ-JENSEN, T. Mold spore counts in outside air in Copenhagen. 104-13.
DENCKER, F., & SCHWARTZ, M. The absorption and circulation of antigen, elucidated by trans-fusion experiments. 114-8.

2. Anatomy; Histology

Acta anat., Basel, 1948, 5: No. 1-2

- REYNOLDS, S. R. M. Morphological determinants of the flow-characteristics between an artery and its branch, with special reference to the ovarian spiral artery in the rabbit. 1-16, pl.
CAVAZZANA, P., & BORSETTO, P. L. Recherches sur l'aspect microscopique des plexus nerveux intramurales et sur les modifications morphologiques de leurs neurones dans les divers traits de l'intestin humain pendant la vie. 17-41.
BROMAN, I. Warum werden die äusseren Geschlechtsstelle der Artiodactyla bei den verschiedenen Geschlechtern so weit in entgegengesetzten Richtungen verschoben? 42-56.
FISCHER, A. Morphological aspects of animal tissue cells in synthetic media. 57-71.
CARLES, J. Les glandes œsophagiennes et œsophago-gastriques, particulièrement la muqueuse de la zone cardiaque et les glandes cardiaques chez l'homme. 72-88.
ROZYNEK, M. Experimenteller Beitrag zur Frage des Gewebsgleichgewichts. 89-98.
COOPER, H. R. A. The development of the human auditory pathway from the cochlear ganglion to the medial geniculate body. 99-122.
AMPRINO, R. Recherches et considérations sur la structure du cartilage hyalin. 123-46.
IM OBERSTEG, J. Zur funktionellen Struktur der Fascien. 147-70.
VERLOOP, M. C. The arteriae bronchiales and their anastomoses with the arteria pulmonalis in the human lung; a micro-anatomical study. 171-205.
THEILER, K. Studien zur Entwicklung der Ganglien-leiste und doppelter Spinalganglien. 206-16.

Arch. anat. micr., Par., 1948, 37: No. 1

- POLICARD, A. Sur quelques points de l'histo-physiologie des bronchioles. 1-27.
VELICAN, C. Le dispositif sphinctéro-propulseur de la surrénale. 28-40.
CLAVERT, J. Etude histologique de l'involution de l'os folliculaire du pigeon. 41-8.
LE CALVEZ, J. Observations phéno-génétiques sur la mutation *Aristapedia* dominante de *Drosophila melanogaster*. 50-72.

4. Anthropology

Arch. antrop. crim., Milano, 1948, 68: No. 2 (Apr.-June)

- LATTES, L. Medicina ed emigrazione. 93-130.
GIOLLA, P. Appunti in tema di medicina legale delle pensioni privilegiate. 131-62.

5. Bacteriology; Parasitology

J. Bact., Balt., 1948, 56: No. 2 (Aug.)

- PACKALÉN, T. Nonspecific antistreptolysin reactions and serum (or pleural-exudate) cholesterol. 143-56.
KELNER, A. A method for investigating large microbial populations for antibiotic activity. 157-62.
EAGLE, H., & STEINMAN, H. G. The nutritional requirements of treponemata; arginine, acetic acid, sulfur-containing compounds, and serum albumin as essential growth-protecting factors for the Reiter treponeme. 163-76.
YEGIAN, D., & VANDERLINDE, R. J. A quantitative analysis of the resistance of mycobacteria to streptomycin. 177-86.
LAZARUS, A. S., & NOZAWA, M. M. The endotoxin of *Pasteurella pseudotuberculosis*. 187-90.
WALKER, S. B., BEROW, M. A., & SCHAFFER, N. K. The partial purification of staphylococcalase and the effect of certain presumptive inhibitors upon its plasma-coagulating action. 191-4.
TRAGER, W. The effects of lysolectin on the growth of *Lactobacillus casei* in relation to biotin, pantothenic acid, and fat-soluble materials with biotin activity. 195-9.
SUGG, J. Y., & MAGILL, T. P. The serial passage of mixtures of different strains of influenza virus in embryonated eggs and in mice. 201-6.
PAINE, T. F., JR., & FINLAND, M. Observations on bacteria sensitive to, resistant to, and dependent upon streptomycin. 207-18.
MUELLER, J. H., & MILLER, P. A. Unidentified nutrients in tetanus toxin production. 219-33.
SATTLER, T. H., & YOUNG, G. P. The effect of tween 80, bovine albumin, glycerol, and glucose on the growth of *Mycobacterium tuberculosis* var. *hominis* (H37Rv). 235-43.
YOUNG, A. S., & YOUNG, G. P. The effect of tween 80 in vitro on the bacteriostatic activity of 20 compounds for *Mycobacterium tuberculosis*. 245-52.
KLOTZ, I. M., & MELLODY, M. The reversal of benzimidazole inhibition of growth by nucleic acid. 253-5.
DREA, W. F. Growth inhibition of the H37 strain of human tubercle bacilli by β -2-thienylalanine and its prevention by phenylalanine. 267.

J. Parasit., Lasc., 1948, 34: No. 4 (Aug.)

- HUFF, C. G., COULSTON, F. [et al.] Symposium on exoerythrocytic forms of malarial parasites. 261-320.
- HUFF, C. G., & COULSTON, F. A search for pre-erythrocytic stages of *P. vivax* and of *P. cynomolgi*. 264-74.
- COATNEY, G. R., & COOPER, W. C. The chemotherapy of malaria in relation to our knowledge of exoerythrocytic forms. 275-89.
- COULSTON, F., & HUFF, C. G. The chemotherapy and immunology of pre-erythrocytic stages in avian malaria. 290-9, incl. pl.
- PORTER, R. J. Studies in tissue culture of exoerythrocytic schizogony in avian malarial parasites. 300-5.
- HAAS, V. H., WILCOX, A. [et al.] Response of exoerythrocytic forms to alterations in the life-cycle of *Plasmodium gallinaceum*. 306-20.
- BUSH, D. L. Experimental transmission of the 3M strain of *Plasmodium cathemerium* to the duck and its chemotherapeutic suitability for routine antimalarial screening. 321-31.
- TINER, J. D. Rictularia dipodomys n. sp. (Nematoda; Thelastidae) from the kangaroo rat *Dipodomys* sp. 332-5, incl. pl.
- JAMESON, E. W., JR. Myobid mites (Acarina: Myobinidae) from shrews (Mammalia: Soricidae) of eastern North America. 336-42.
- CALERO M., C. Cutaneous myiasis in Panama. 343.
